REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the prior art fails to teach or fairly suggest the series of steps recited, particularly the steps of aligning the connecting piece radially to the tube and joining them by friction welding with a friction depth amounting to less than 80% of the wall thickness of the tube.

Regarding claim 4, the prior art fails to teach or fairly suggest the series of steps recited, particularly the steps of aligning the connecting piece radially to the tube and joining them by friction welding with a friction depth amounting to less than 80% of the wall thickness of the tube. Applicant incorporated the previously indicated allowable subject matter of claim 4, wherein a through bore is drilled into the connecting piece after welding, said bore being connected with an interior of said tube via a lateral opening in said peripheral wall produced after welding, into amended claim 4.

Regarding claim 6, the prior art fails to teach or fairly suggest the series of steps recited, particularly the steps of aligning the connecting piece radially to the tube and joining them by friction welding with a friction depth amounting to less than 80% of the wall thickness of the tube. Applicant incorporated the previously indicated allowable subject matter of claim 6, wherein the connecting piece has a smaller diameter end on the tube side such that with the connecting piece welded on, forms a groove in which a weld bead is situated, into amended claim 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
